AAU conclude the work of the “International Conference of Science and Arts”

Al Ain University of Science and Technology concluded the work of the “International Conference of Science and Arts”, which was launched in Al Ain campus, in collaboration with the American International Journal of Arts and Sciences, and under the patronage of Sheikh Hazza bin Tahnoun bin Mohammed Al Nahyan, the Undersecretary of the Diwan of the Ruler's Representative in the Eastern Region, In addition to the attendances of a number of researchers from various countries, and in the presence of faculty members and researchers, which has been held 16 times a year in different countries around the world such as the United States, France, Spain, Greece, Italy, Australia, New Zealand, Brazil, Canada, It is the first time for the conference to be hosted in the Arab world in Al Ain University of Science and Technology.

The conference discussed the researches that have been accepted and presented by the researchers who

explained their papers, it included workshops and meetings between researchers from out of and within the state to discuss several scientific issues, as well as dialogues between university students and participants.

Dr. Noor Aldeen Atatreh, AAU Chancellor, expressed his delight cooperation between Al Ain University of Science and Technology and the American International Journal of Arts and Sciences in establishing this conference, and the university's pride for hosting the International Conference for the first time in the Arab world, he added that embrace of the scientific conference as a whole will contribute to the achievement of enhancing research policy and scientific creativity, which the United Arab Emirates has already adopted this approach, and which attaches great importance to researchers, and supports the march of science and scientific research, and enhances the intellectual and scientific development in the state.

For his part, Dr. Joseph Azzopardi, Representative of the International Conference appreciated Al Ain University of Science and Technology for the organization and hosting the International Conference, expressed his pleasure for working with the university, and praised the efforts that made by all officials and organizers of the conference in order to show the best of its closure.

The last day of the conference contained the recommendations and presentations for the second group of researchers, as well as the closing ceremony of the conference. Prof. Ghaleb Al-Refae, AAU President, expressed that the Al Ain University of Science and Technology is always ready to embrace and support such scientific conferences, as he also stressed the importance of scientific research and its impact on cultural and knowledge exchange, considering these useful conferences as an opportunity to communicate with researchers from abroad and academics at the University with each other, Furthermore, he recommended the researchers to follow up on all new things and encouraged them to do more research, stressing the active role of the youth and the new generation in the field of scientific research, and the needs to support and encourage young cadres.

It is noteworthy that the International Conference of Science and Arts comes to deal with the latest developments in the world of social, humanitarian and economic and technology Arts, it is also a unique opportunity to bring experts, academics, and researchers, and let them communicate with each other, with the notion that the number of participants in this conference was more than a hundred, from various countries.
