AAU launches a Mobile Application for the Students

Al Ain University of Science and Technology launched a mobile application for the students as an effective and fast way to communicate directly with them and take advantage of the online services which offered for the university's students, This application comes to keep abreast of the technological development in the United Arab Emirates and the shift of the smart government that will meet the needs of the public, Where the application provide a range of electronic services such as, electronic registration, online courses, financial information and many other electronic services, where students can download the application for free through Apple and Android store.

On this occasion, Dr. Noor El Deen Atatreh –AAU Chancellor- stressed on that Al Ain University

of Science and Technology always seeks to keep pace with technological and electronic evolution and its commitment to meet the needs of students and to provide all means of comfort which enables the student to communicate with League with ease.

He added that the smartphone has become an important tool to gain access to many services, in addition to that the technical role has become an important element to improve the services for the students and to communicate with them directly and to save time and effort.

This application considered as a first step of a group of e-services which will be launched by the university for its students in the coming years in order to make the student's needs in an easy way and to improve the quality of education at the university, which will impact on the level of scientific output of the students.
