## **A discussion Session on: Bridging the Divide in Healthcare through Digital Technology**

The College of Engineering at Al Ain University (Al Ain Campus) organized a seminar about bridging the gap in healthcare through digital technology in the framework of preparing for the 'Global Digital Health, Knowledge Exchange, and Empowerment' conference organized by the university in June 2024.

Professor Mohamed Odeh, President of the Global Academy for Digital Health, presented a symposium on the ability of healthcare professionals to develop important paths to align with the use of digital technology to bridge the gap in providing healthcare to the patient.

The attendees of this seminar had the opportunity to engage with the gDigiHealth.KEE 2024 conference management in questions and answers mini-session regarding the conference scientific papers' submission process, the workshops' attendance requirements, and any other digital health queries in association with this conference.

The "Global Digital Health, Knowledge Exchange and Empowerment" (gDigiHealth.KEE 2024) conference is an attempt to address insights into some of the key unmet needs of digital

healthcare strategy and policymakers through providing accessibility to state-of-the-art digital health research and development output, and In this seminar, the scientific research papers tracks will be explored and will introduce the seven key digital health workshops of the gDigiHealth.KEE 2024 conference, along with their role in developing the capacity of healthcare professionals.
